Crewed Sailing Yacht Charter Greece with Eratosthenes - She is 112-foot Swan super-sailing-yacht, built by Nautor of Finland. Launched in 2002, she combines the top racing yacht performance with world-class comfort and opulence. She offers luxury accommodation for six guests, and carries a crew of up to six in separate quarters. Eratosthenes achieves the ideals of comfort and performance, interior space and outside length while retaining a simplicity in deco and looks. Attention to every detail from the carbon fibre mast, the teak decking, down to the last shackle has made the Nautor Swan a byword for excellence. Take the helm, hoist the Code O with the flip of a switch and experience the exhilaration of having over 4305 extra square feet of sail under comfort and easy control. Her perfect proportions, jet blue hull, white superstructure, teak decks and mahogany interior result in an overwhelming result of great sailing yacht style. Unlike most sailing yachts, Eratosthenes' custom design gives a panoramic view from the upper salon. The polished wooden surfaces and soft leather upholstery combine elegance and comfort in a traditional club atmosphere. High quality entertainment is available at a touch of a button, with a CD surround sound stereo system and a Giant plasma TV screen rises into view with satellite TV, DVD or computer generated positional plotting. The dining area seats six guests comfortably. Riding at anchor, or while cruising under power at up to twelve knots relax on the sheltered banquettes with ample space for up to ten guests and enjoy al fresco meals in the shade of the bimini. The crew are experts in the art of encouraging relaxation. On hand, to help you with the leisure equipment and invisible when you want to be alone or enjoy the company of friends. Ride the wind with one of the fastest and smoothest sailboats on the water with sophisticated cruise features and fully automated rigging,
